OF MEDICINE**  
Charles University

**3rd ESPU Educational Committee Masterclass**

# **Laparoscopy of the Upper Urinary Tract in Children**

**Saturday - January 21, 2017**

**Department of Urology, First Faculty of Medicine, Charles University  
Prague, Czech Republic**

# Introduction and concept

Masterclass is a new formula that has recently been introduced by the Educational Committee of the European Society for Paediatric Urology (EC-ESPU). The aim of such a meeting is to thoroughly discuss one chosen topic in a small group with specialists. The first course focusing DSD took place at Stockholm (October 2014), the second one concerning incontinence in children with non-neurologic bladder was successfully organized at Amsterdam (June 2015).

It is our privilege to invite you on behalf of the EC-ESPU and Department of Urology, First Faculty of Medicine, Charles University at Prague to participate in Masterclass in Laparoscopy of the Upper Urinary Tract in Children.

The Masterclass is designed for paediatric surgeons who already have experience in laparoscopy. We will meet in a cosy room in the hospital to keep the meeting warm and interactive. That also means that only a limited number of participants can be accepted. Coffee breaks and lunch will be provided during the day.

Transform your approach and gain deeper understanding of every aspect of laparoscopy of upper urinary tract in children.

We are looking forward to hearing from you.

*Marcel Drlík, Radim Kočvara*
